**Sunday AM**

**Novel Drug Design/  
Overcoming Resistance**

**Robert Jackson**  
**Fred Opperdoes**  
**Erwin Kuntz**

**WORKSHOP:**  
**Saturday afternoon**

**Drug resistance in**  
***Mycobacterium***  
***tuberculosis***  
**Drug design/comp bio**

**William Jacobs, chair**  
**Julia Inamine**  
**Douglas Smith**  
**Douglas Young**

**THE ALBANY CONFERENCES** are organized in a collegial format - with participation limited to approximately 125 persons - intending to promote interaction among the participants. Along with regular sessions, we offer poster presentations, round-table discussions, and one-on-one dialogue. Participants at the Albany Conference typically include scientists from university, industry and government laboratories, throughout the United States and abroad. The conference center, a state-of-the-art facility located 27 miles southwest of Albany in the Helderberg Hills, offers a pleasant atmosphere for study and recreation.
